

PAN Arab

Upper Limb Trauma Symposium

May 18th, 19th & 20th 2012

Movenpick Hotel, Beirut
Lebanon

The Pan Arab Orthopaedic Association organizes its first symposium among a series of symposia on traumatic injuries of the musculo-skeletal system. Eminent International and Arab specialists in the field will participate to make it a successful and attractive event. The aim of this meeting is to bring together all orthopaedic surgeons interested into musculo-skeletal trauma, including residents, fellows as well as top of the notch specialists, and the final goal is to provide to our patients a high standard level of care.

This first symposium is without a doubt challenging and very ambitious. It is organized in form of 3 days course that intends to achieve an in-depth review of various aspects of traumatic lesions of the shoulder and elbow. Anatomy and surgical approaches of both regions are reviewed; theoretical and practical basis of reading radiographs, CT and MRI in traumatic situations are explained. The wide panoply of traumatic shoulder and elbow injury patterns is detailed along with interactive case discussions. The principles of management are exhaustively analysed, discussed and supported by video presentations; they comprise various situations including sprains, dislocations, fractures, fracture-dislocations, ligamentous and tendinous lesions.

At the end of the course, participants should be able to make decision when they are faced with traumatic injuries of shoulder and elbow, from the simplest to the most complex situations.

PAN Arab Upper Limb Trauma Symposium

We hope this first trauma symposium will be fruitful and followed by other profitable meetings in the trauma field.

We will be looking forward to have you among us!

Sincerely yours,

Mohamad H. Darwish MD, FRCS

Secretary General
of the Pan Arab Orthopaedic Association

Ali H. Chamseddine MD, FACS

Vice-Secretary General of the
Pan Arab Orthopaedic Association
Chairman of the Symposium

TOPICS

Shoulder Trauma

- Surgical anatomy and surgical approaches of the shoulder
- Radiographic evaluation in shoulder trauma
- CT and MRI in shoulder trauma
- Fractures of the clavicle
- Acromio-clavicular dislocation
- Sterno-clavicular dislocation
- Fractures of the scapula and glenoid
- Fractures of the proximal humerus
- Anterior shoulder dislocation
- Posterior shoulder dislocation
- Fractures of the humeral shaft
- Video presentations: Surgical techniques for Shoulder trauma
- Interactive case discussion: Shoulder trauma and humerus fractures

Elbow trauma

- Surgical anatomy and surgical approaches of the elbow
- Radiographic evaluation in elbow trauma
- CT and MRI in elbow trauma
- Supra and Inter-condylar fractures of the distal humerus
- Coronal fractures of the distal humerus
- Concepts of elbow stability
- Spectrum of elbow dislocation
- Posterolateral rotatory instability of the elbow
- Fractures of the radial head
- Fractures of the Olecranon and Coronoid
- Complex elbow fractures and fracture-dislocations
- The Hinged External Fixator in elbow trauma
- Monteggia Lesion
- Ruptures and avulsions of the distal triceps tendon
- Ruptures of the distal Biceps tendon
- Video presentations: Surgical techniques for Elbow trauma
- Interactive case discussion: Elbow trauma

Registration fees

US\$450 per participant including

- Access to the Scientific sessions and the exhibition area
- CME credits
- Certificate of attendance
- Coffee Breaks
- 2 Lunches

Hotel name	Rooms Categories	Rate
